

# IS YOUR NETWORK FUNCTIONING AS INTENDED?

**IP Fabric is an Intent Based Networking technology that serves as the foundation for network programmability, automation and analytics by delivering critical information required to manage your network operations.**

“

If I had the budget to buy only one product that would immediately benefit both traditional network engineers and accelerate network automation projects it would be IP Fabric.

Major League Baseball

## Automated assurance platform

IP Fabric's Network Assurance Platform has 3 stages of adoption: Baseline, Operate and Innovate, each designed to take you a step farther down the road to the self-driving network.

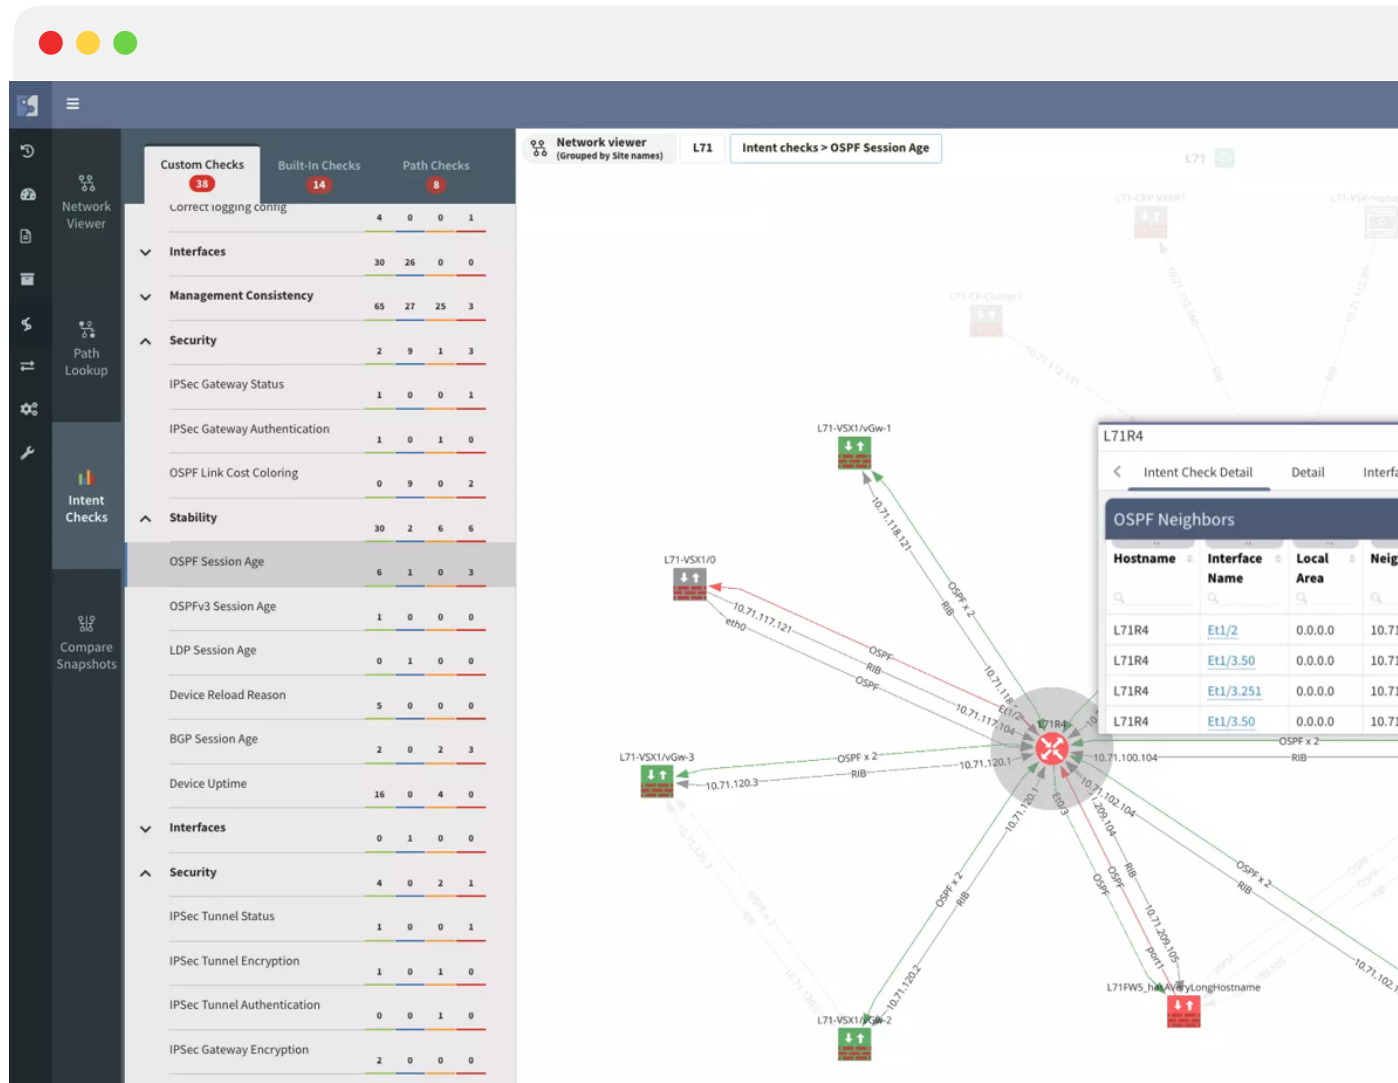

**Baseline:** Shine light into the dark corners of the multi-vendor network for a full picture of the inventory, configuration, topology, and state.

**Operate:** IP Fabric uses data from across your entire network to enhance your operational process.

4.0

**Innovate:** Start integrating with other technologies to put the data intelligence from IP Fabric to work.

# 01

## **ORDER FROM CHAOS**

Rapidly discover your whole network and its state. Get the answers and clarity you need for a firm foundation to build your network projects and operations on

# 02

## **INCREASED OPERATIONAL EFFICIENCY**

Make key operational tasks easier and less resource intensive, enabling your teams to focus on higher value projects. As an added bonus get more value from your existing networking toolkit.

# 03

## **OPEN THE DOOR TO RAPID INNOVATION**

Open the door to rapid innovation with an automated, transparent network that seamlessly scales to your business requirements.

At every step in your businesses journey, IP Fabric ensures your network is there to support you, not hinder you. We do this by providing revolutionary functionality that simplifies network management and provides a solid foundation to build your projects on. That's what we call Automated Network Assurance. By providing answers to your key questions at each stage of your evolution, we guide and enable your journey to a self-driving automated network.

## **WE PLAY NICE WITH OTHERS**

IP Fabric does not aim to replace all your other networking tools, but by providing a clear, reliable single point of reference and information, it lets you get more out of those you have. Augmenting existing investments and processes.

The open API and integration options makes IP Fabric the unifying / consolidating factor in your networking projects – serving as an anchor point to drive Network Automation and Intent-based networking.

## ABOUT IP FABRIC

IP Fabric is solving Network Assurance for large enterprises by creating a digital twin of the entire network infrastructure, containing information about every technology and protocol, and capable of simulating forwarding and security scenarios. IP Fabric's network model is also used as a Network Source of Truth for network automation initiatives, serving as an API for the entire network. IP Fabric was recognized by Gartner as Cool Vendor in Network Automation for 2022.

Don't take our word for it
